

Prof. Samir El-Khoury

Professor of Computer Science - Beirut, Lebanon
samir.elkhoury@example.com | 01 350 774

ACADEMIC APPOINTMENTS

Professor of Computer Science, Lebanese University, 2016 - Present

Associate Professor, Lebanese University, 2010 - 2016

Assistant Professor, Universite Saint-Joseph, 2005 - 2010

RESEARCH INTERESTS

Distributed consensus, storage systems, formal verification of concurrent data structures, and the teaching of systems programming.

SELECTED PUBLICATIONS

- S. El-Khoury, A. Nassar and M. Yazbeck. "Consensus under partial synchrony: part 1." In Proceedings of PODC 2024, pages 100-118.
- S. El-Khoury, L. Tannous and K. Rahme. "A lock-free skip list revisited: part 2." In Proceedings of DISC 2024, pages 113-131.
- S. El-Khoury, R. Bitar and N. Sleiman. "Verifying linearisability by refinement: part 3." In Proceedings of OSDI 2024, pages 126-144.
- S. El-Khoury, M. Yazbeck and H. Daher. "Snapshot isolation in practice: part 4." In Proceedings of SOSP 2024, pages 139-157.
- S. El-Khoury, K. Rahme and J. Aoun. "On the cost of exactly-once delivery: part 1." In Proceedings of EuroSys 2024, pages 152-170.

- J. Aoun, PhD 2016. Thesis: "Partitioning strategies for multi-tenant stores". Now at SIGMOD.
- P. Sarkis, PhD 2017. Thesis: "Clock skew and its consequences". Now at ICDCS.
- T. Chami, PhD 2018. Thesis: "Compaction scheduling under load". Now at NSDI.
- A. Nassar, PhD 2019. Thesis: "Write amplification in tiered storage". Now at ATC.
- L. Tannous, PhD 2020. Thesis: "Consensus under partial synchrony". Now at PODC.
- R. Bitar, PhD 2021. Thesis: "A lock-free skip list revisited". Now at DISC.
- M. Yazbeck, PhD 2022. Thesis: "Verifying linearisability by refinement". Now at OSDI.
- K. Rahme, PhD 2023. Thesis: "Snapshot isolation in practice". Now at SOSP.
- N. Sleiman, PhD 2024. Thesis: "On the cost of exactly-once delivery". Now at EuroSys.
- H. Daher, PhD 2010. Thesis: "Replication without coordination". Now at VLDB.
- J. Aoun, PhD 2011. Thesis: "Bounded staleness for read replicas". Now at SIGMOD.
- P. Sarkis, PhD 2012. Thesis: "A calculus for transactional outboxes". Now at ICDCS.
- T. Chami, PhD 2013. Thesis: "Recovery time in log-structured stores". Now at NSDI.
- A. Nassar, PhD 2014. Thesis: "Fault injection as a first-class test". Now at ATC.
- L. Tannous, PhD 2015. Thesis: "The price of serialisability". Now at PODC.
- R. Bitar, PhD 2016. Thesis: "Partitioning strategies for multi-tenant stores". Now at DISC.
- M. Yazbeck, PhD 2017. Thesis: "Clock skew and its consequences". Now at OSDI.
- K. Rahme, PhD 2018. Thesis: "Compaction scheduling under load". Now at SOSP.
- N. Sleiman, PhD 2019. Thesis: "Write amplification in tiered storage". Now at EuroSys.
