

Elie Bou Chedid

Senior Backend Engineer | .NET

elie.bouchedid@example.com | +961 3 992 447 | linkedin.com/in/eliebouchedid

SUMMARY

Eight years building backend services, all of them on the Microsoft stack. Strong on distributed systems, relational modelling and correctness-critical work; I have never shipped Java professionally.

EXPERIENCE

Senior Backend Engineer, Argus Trading Systems - Beirut

02/2020 - Present

- Own three ASP.NET Core services in the order management path for an equities broker, handling around 60,000 orders on a busy day.
- Designed the order state machine and its persistence in PostgreSQL, with an idempotency table keyed on client order ID that made retries safe after a broker gateway outage caused duplicate submissions.
- Introduced RabbitMQ between order capture and risk checks, then migrated to Kafka in 2023 for replay; I wrote the consumer offset and dead-letter handling.
- Reduced p99 on the position endpoint from 1.2 seconds to 95 milliseconds by restructuring three queries and adding two composite indexes.
- Run the services on Kubernetes, including the Helm charts and the Prometheus alerting rules.
- Set up distributed tracing across seven services with OpenTelemetry after a latency investigation took two days.

Backend Developer, Nexa Software - Beirut

09/2017 - 01/2020

- Built REST APIs in .NET Core consumed by a mobile client and two partner integrations, with versioning and a documented deprecation window.
- Modelled and tuned a SQL Server schema for a 40 million row transactions table, including partitioning by month.
- Wrote integration tests against a containerised database and brought the suite into the build.

EDUCATION

BE in Computer Engineering, Beirut Arab University, 2017

SKILLS

C#, .NET Core, ASP.NET Core, Entity Framework Core, PostgreSQL, SQL Server, Kafka, RabbitMQ, Kubernetes, Docker, OpenTelemetry, xUnit, Azure DevOps.

NOTE ON JAVA

I have read Effective Java and written a Spring Boot service as a side project to learn the ecosystem, but I would be learning Spring in anger on the job.
