

Fadi Rizk

Structural Engineer, MEng

fadi.rizk@example.com | 03 806 442 | Beirut, Lebanon

SUMMARY

Structural engineer with ten years on reinforced concrete and steel buildings in Lebanon and the Gulf. Order of Engineers registered.

EXPERIENCE

Senior Structural Engineer, Batimat Consulting - Beirut

01/2019 - Present

- Lead structural designer on nine buildings between six and twenty-two storeys, including a 22-storey residential tower in Achrafieh.
- Perform seismic analysis to ACI 318 and Eurocode 8, and produce the design calculations that go to the permitting authority.
- Model structures in ETABS and SAFE; check foundation design against geotechnical reports and coordinate with the geotechnical consultant.
- Review shop drawings and answer contractor RFIs during construction; site visits twice weekly during structural works.
- Supervise two junior engineers and check their calculations before issue.

Structural Engineer, Gulf Design Bureau - Dubai

03/2015 - 12/2018

- Structural design for commercial and mixed-use projects, working to Dubai Municipality requirements.
- Steel connection design and detailing for two warehouse projects totalling 14,000 square metres.

EDUCATION
